

How a Wyoming District Triumphed with Simplified Account Management and Analytics

Sublette County School District implemented a 1:1 program that enabled each student to have their own digital learning device. However, they struggled to connect students to digital resources, manage user accounts, and determine app usage.

ClassLink's IAM solutions granted students and faculty easy access to online resources and quick and simple account management. With efficient rostering and insights into application usage, Administrators could more effectively assimilate student information systems and make informed purchasing decisions for online resources.

“ClassLink is absolutely the way to go because while it’s easy to use, it’s still very powerful, and at the district level, I don’t know that I would be able to do my job without ClassLink.”
